ICHOM Job Title

ICHOM Standardisation Director (with a focus on Mental Health Standardisation Programme)

Background

ICHOM is a non-profit organization committed to transforming health care to a value-based system through universal measurement and reporting of patient outcomes. ICHOM was co-founded in November 2012, by Professor Michael Porter of Harvard Business School, and thought leaders from the Boston Consulting Group, and the Karolinska Institutet in Sweden.

One of ICHOM's primary activities is the development of global Standard Sets by medical condition or population. Standard Sets are the most essential outcomes that all providers should collect, along with an essential set of baseline patient characteristics for risk adjustment. To develop these standards, ICHOM brings together Working Groups composed of clinical leaders, registry leaders, and patients and leads them through a structured, consensus-driven process. ICHOM also supports organisations to implement and measure our global standards of outcomes that truly matter to patients by medical condition and launched a benchmarking programme in May 2016.

We believe measurement and reporting of ICHOM Standard Sets will:

- Help patients better choose the right treatments and providers for their needs
- Enable providers to benchmark and compare how well they are meeting the needs of their patients compared to their peers
- Allow payors to contract on the value of care delivered, not simply volume

ICHOM is a rapidly growing organisation that is gaining considerable traction worldwide. We believe in growing our employees, their personal development, and see this position as an excellent starting point for someone looking to progress their career in a fast-paced environment that adds value to healthcare systems worldwide.

Duties & Responsibilities

We are seeking a Director who can lead and supervise standardisation efforts across the area of mental health. Duties include, but are not limited to:

- Recruiting and managing relationships with international medical experts and patient advocacy representatives.
- Supervising Project Leaders in project plans, setting milestones, running meetings and patient focus groups, and coordinating the efforts of around 15-25 senior medical experts in any given working group.
- Planning the project funding phase and support in bringing together funding to meet project needs
- Recruiting and line-managing a project management and research support team composed of project leaders, research assistants and research fellows.
- Overseeing publications and reports by teams to announce the standard set of measures
- Planning the marketing phase to drive adoption of ICHOM's standard sets around the world.
- Recruiting and managing relationships with physicians and senior management within our implementation partners, and planning the implementation phase to drive adoption of ICHOM's Standard Sets.
- Running on-site events/community teleconferences in order to facilitate the adoption and implementation of our Standard Sets of outcomes.
- Assuring the high quality of Standard Sets produced across the Standardisation team
- Developing engagement models and securing engagements with external stakeholders.
- Designing and implementing projects in collaboration with external stakeholders.
- Producing and delivering presentations and running meetings.
- Writing business-style case studies and articles targeted at a diverse audience of senior health care stakeholders.
