Making It Happen!

The Global Outcomes Benchmarking (GLOBE) Program

May 16, 2016

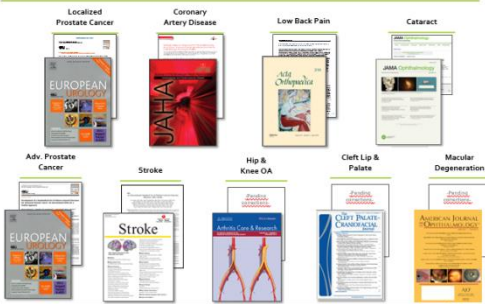

Our Strategic Agenda

Since our founding we've been working towards benchmarking

Define Standards

21 standard sets to be delivered by the end of 2016 with 9 published/accepted for publication

21 standard sets by the end of 2016 covering 45% of the disease burden

Measure outcomes

Global implementation is ramping up rapidly
Select organizations around the globe implementing or measuring Standard Sets

Measuring/implementing institutions in over 30 countries

Benchmark on outcomes

1 Select the right Partner

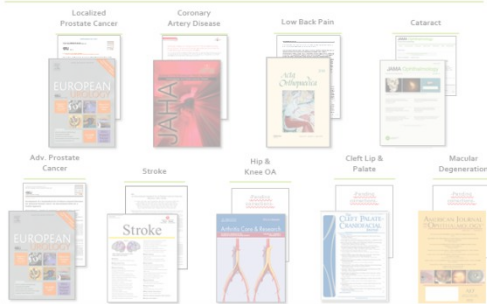

2 Pilot global benchmarking

3 Launch global benchmarking program

Since our founding we've been working towards benchmarking

Define Standards

21 standard sets to be delivered by the end of 2016 with 9 published/accepted for publication

21 standard sets by the end of 2016 covering 45% of the disease burden

Measure outcomes

Global implementation is ramping up rapidly
Select organizations around the globe implementing or measuring Standard Sets

Measuring/implementing institutions in over 30 countries

Benchmark on outcomes

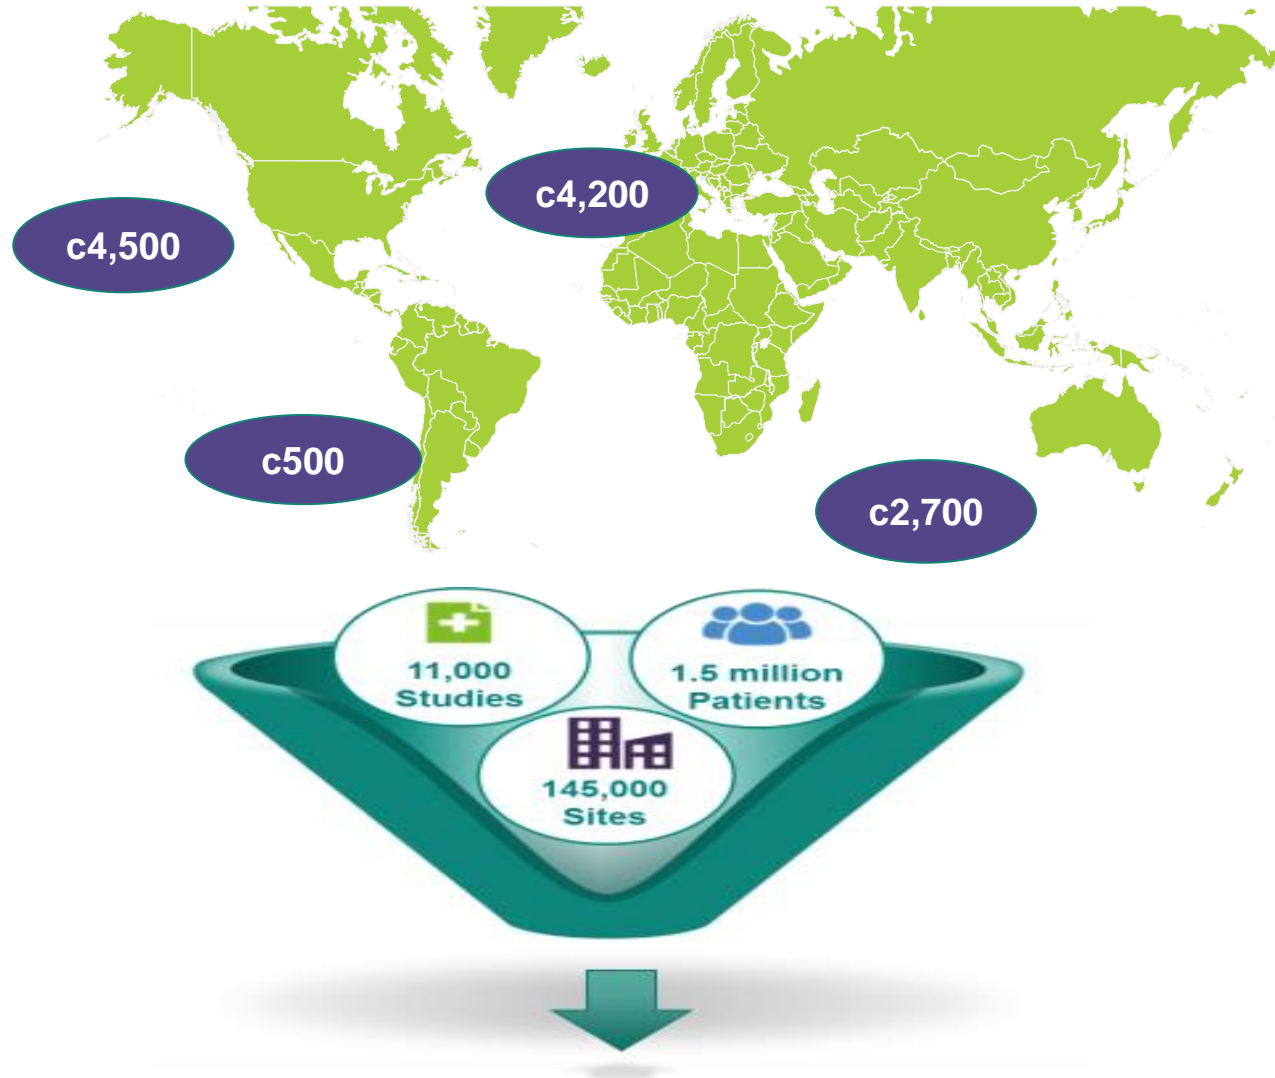

1

Select the right Partner

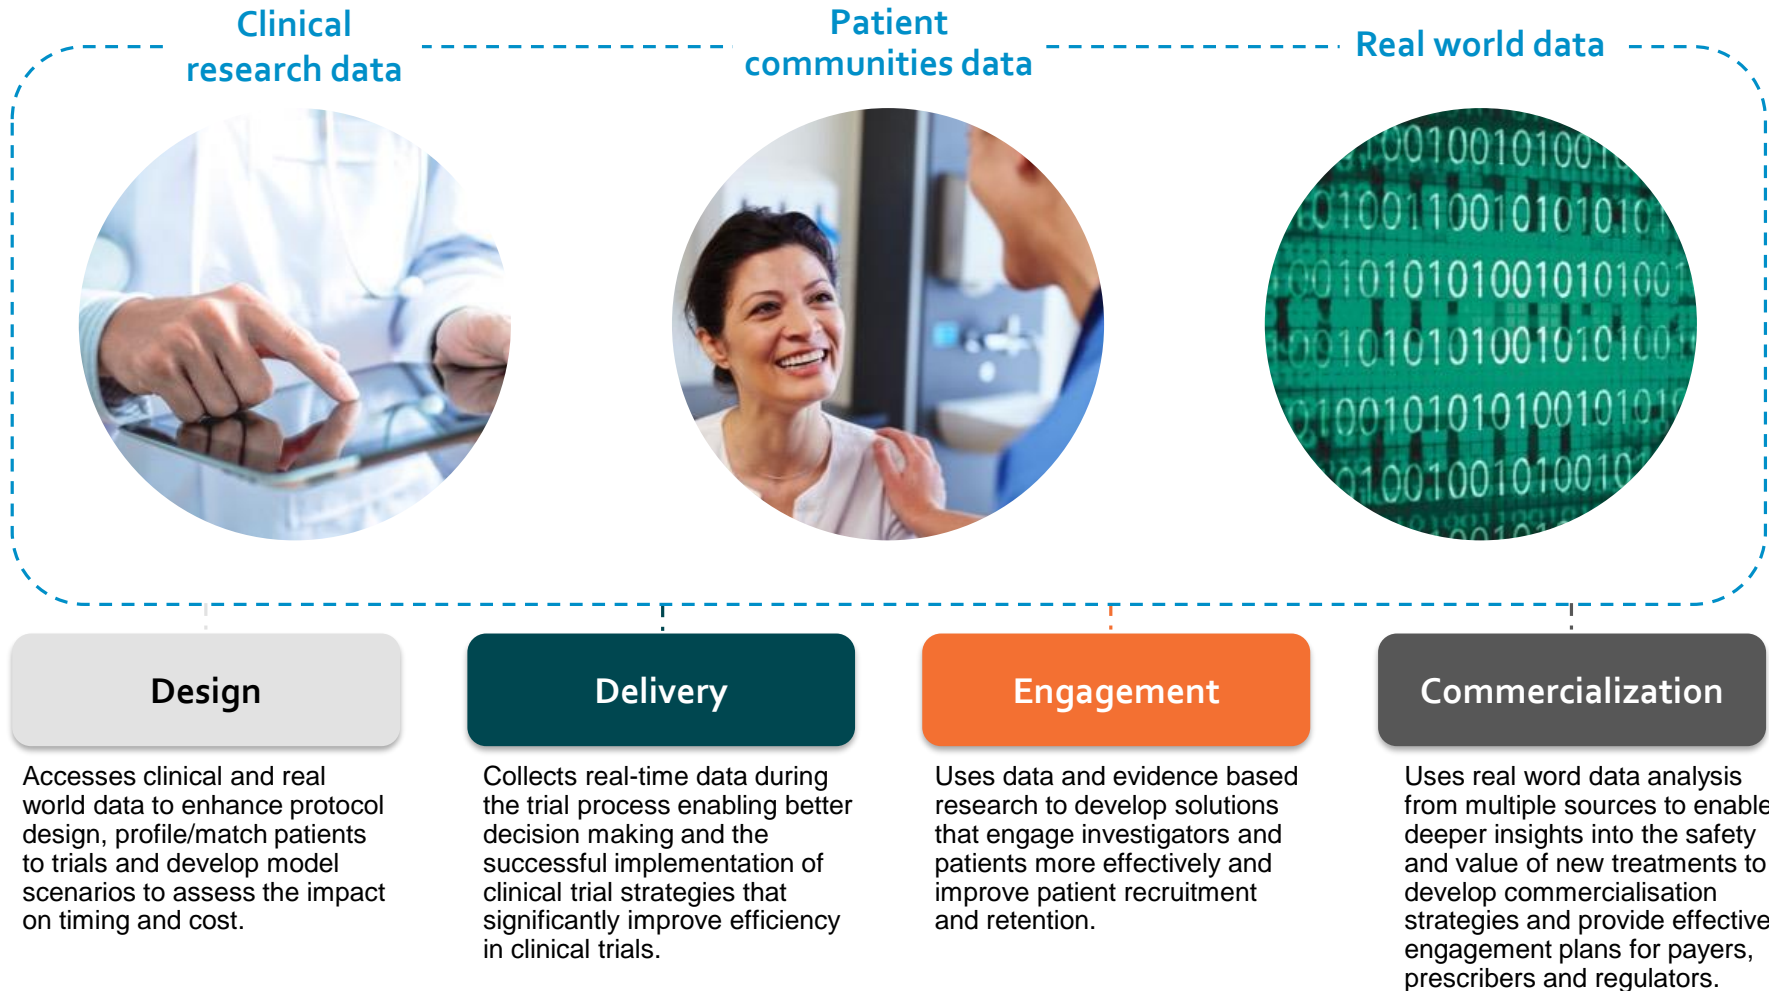

A truly global partner whose strengths compliment ICHOM

ICON is an international CRO with extensive experience in data collection and management in numerous markets

ICON is an international CRO with extensive experience in data collection and management in numerous markets

ICON is excited to partner with ICHOM on this journey

The benchmarking partnership aligns well with our core mission...

Patients and the delivery of new therapies are at the forefront of our mission

Opportunity to engage patients in the development of new medicines

- New treatment options
- Improve quality of life
- Avoid preventable deaths

Aligns with our overall interest in benchmarking across the industry

- TransCelerate
- Metrics Champion Consortium

...and offers the potential for truly transformative changes

Leverage benchmarking to transform clinical trials

- Optimize trial design
- Pioneer innovative technologies (e.g., Cognitive and quantum computing)
- Site & patient-centric focus
- Reducing the costs of drug development

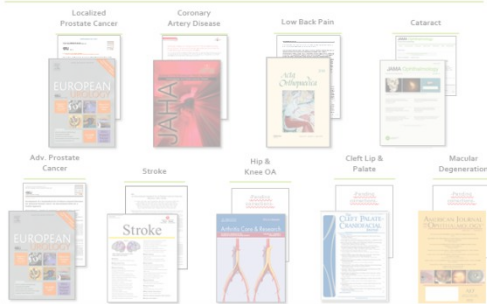

Leverage Big Data and benchmarking standards to develop new medicines

- Real-time data capture and new technologies (e.g., mHealth/wearables)
- Aging population and opportunity to manage care outside of the clinic
- Genomic and personal data to power the development of targeted treatment/care

Since our founding we've been working towards benchmarking

Define Standards

21 standard sets to be delivered by the end of 2016 with 9 published/accepted for publication

21 standard sets by the end of 2016 covering 45% of the disease burden

Measure outcomes

Global implementation is ramping up rapidly
Select organizations around the globe implementing or measuring Standard Sets

Measuring/implementing institutions in over 30 countries

Benchmark on outcomes¹

2

Pilot global benchmarking

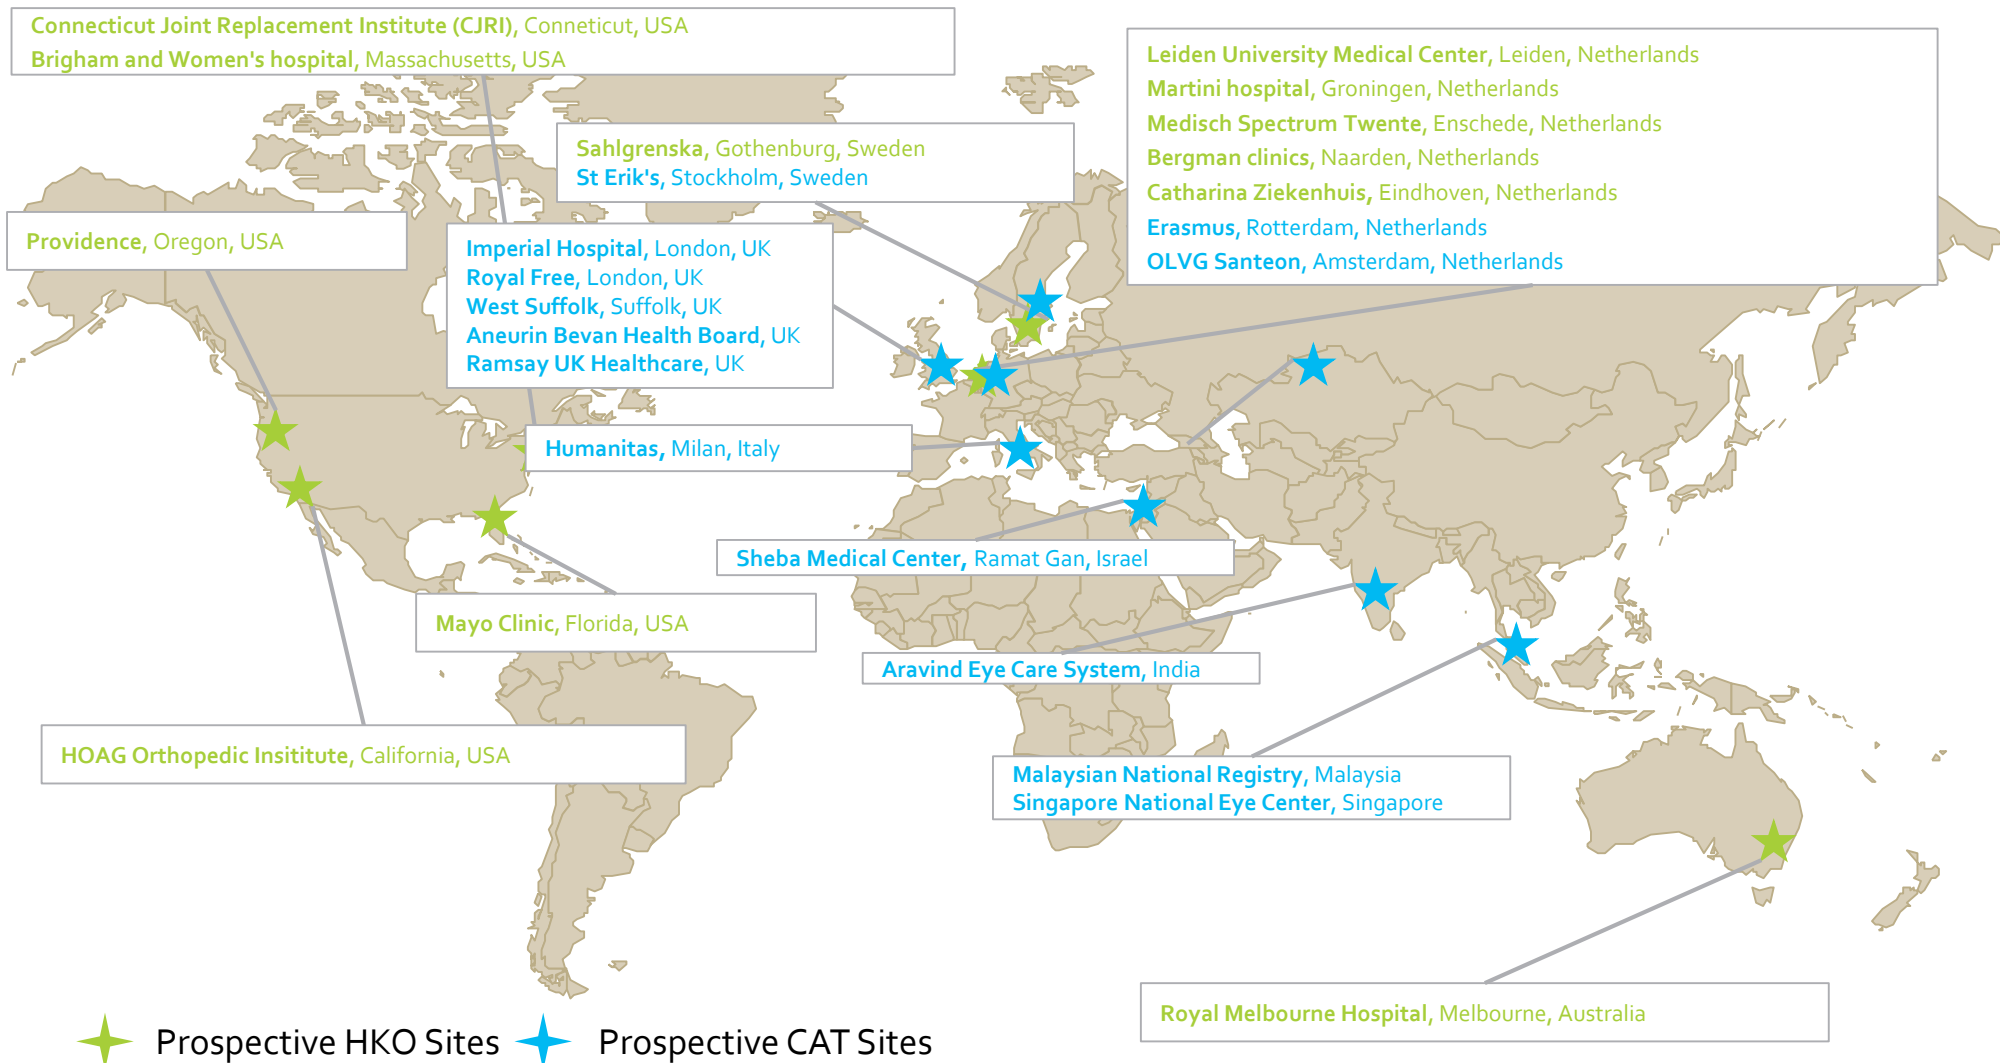

More than 20 Sites across 9 countries in the first ever global outcomes pilot

The Global Outcomes Benchmarking (GLOBE) program

Pilot conditions : Cataracts and Hip & Knee Osteoarthritis

ICHOM & ICON are working with an international network of providers to deliver the first phase of the GLOBE Pilot

The path forward

The GLOBE Pilots

Results expected in Summer/Fall of 2017

- Data collection for both HKO and CAT to kick off in the summer of 2016
- Collection period spans 9 and 12 months for CAT and HKO respectively
- Collection to continue beyond pilot period to develop an international benchmark

How you can get involved?

- HKO and CAT still recruiting!

Email:
globe@ICHOM.org

What comes next

New Pilots

- Pilot programs for new condition areas

Value creation groups

- Facilitated information sharing groups for standard set implementers

Help us design the program & choose the next condition in focus
