ICHOM

Title: Programmer

Location: ICHOMs Headquarters are in Boston, Massachusetts with an office and team also in London and Europe. This role can be a fully remote working role but the team of direct reports are on GMT/CET/EST time zones and the candidate will need to be on similar time zones to ensure the team has support during their working hours. **USA or UK work permit is required.**

Term: Permanent , Part Time

Reporting Relationship: The position will report to the Chief Technology Officer

ICHOM – Background:

ICHOM is a non-profit organisation aspiring to be a key enabler of Healthcare system transformation. ICHOM was co-founded in November 2012 by Professor Michael Porter of Harvard Business School, Dr Stefan Larsson from the Boston Consulting Group, and Professor Martin Ingvar of the Karolinska Institutet. Its mission is to unlock the potential of Value-Based Health Care by defining global Standard Sets of outcome measures that really matter to patients for the most relevant medical conditions and by driving adoption and reporting of these measures worldwide.

ICHOM brings together leading experts from around the world with a number of different initiatives. Standard set development remains at the core of what we do and we have produced 39 standard sets so far. This work is widely publicised through our conference programme, in 2019 more than 1200 delegates from 44 countries attended the largest gathering of VBHC professionals. Following the global pandemic the conference has been delivered through a series of virtual events, concluding with the largest virtual event for 3 days in November 2020. Our Partner Programme offers implementation support to providers who require help implementing standard sets. Our online community, ICHOM Connect, offers a space for healthcare professionals to meet, discuss, evaluate and benchmark their projects and future work. ICHOM is now on the brink of a major development with the launch of machine readable standard sets and a global benchmarking platform. This year will see the team double in size as we prepare for a period of major growth.

Job Description:
