

Inflammatory Arthritis

Conditions covered

Rheumatoid Arthritis | Psoriatic Arthritis | Ankylosing Spondylitis | Juvenile Idiopathic Arthritis

Details

- 1 Multiple outcome instruments will be linked to domain-specific common metrics, using item response theory
- 2 Combination of subjective and objective measures: acute phase response, joint assessment, body surface area & enthesitis and dactylitis (PsA)

For a complete overview of this Set, including definitions for each measure, time points for collection, and associated risk factors, visit <http://www.ichom.org/medical-conditions/inflammatory-arthritis/>
