

**ICHOM**

International Consortium for  
Health Outcomes Measurement

Case Study:

# Centro Integral de Atención del Paciente con Diabetes

# Use case highlights

- Highly **successful adherence** and implementation of ICHOM Set
- Routine data collection and analysis of results performed efficiently to significantly **improve the delivery of health care**
- **Observable and measurable impact** on patient's quality of life, disease progression and satisfaction with care
- Implementation of **innovative and groundbreaking delivery of care model**, consisting of a comprehensive approach to the patient, covering all clinical aspects of the disease to **limit progression of disease and improve prognosis**
- **Demonstrated cost-effectiveness** of new model of care including ICHOM Set implementation
- Model case study for successful implementation of Sets and of value-based healthcare within the **public health sector**

# CAIPaDi - Instituto de Ciencias Médicas y Nutrición Salvador Zubirán

## Centro de Atención Integral al Paciente con Diabetes - Center for Comprehensive Care of Patients with Diabetes

Diabetes-oriented center focused on wellbeing improvement and quality of life of patients living with diabetes through outcomes measurement and a value-based healthcare approach

**Location:** Mexico City, Mexico

**Founded in:** 2013

**Type of organization:**

Public sector outpatient specialty care services

**Number of patients enrolled in past year:**

>3000 patients

**Clinical services:**

- Endocrinology
- Diabetes education
- Nutrition
- Physical activity
- Clinical psychology
- Dentistry - focus on periodontics
- Psychiatry
- Ophthalmology / Optometrist
- Foot care
- Enfermery

## The CAIPaDi leadership & team

**Dr. Sergio César  
Hernández Jiménez**

COORDINATOR

SPECIALIST IN INTERNAL MEDICINE,  
ENDOCRINOLOGY AND DIABETOLOGY

**Dr. Ana Cristina  
García Ulloa**

MEDICAL CARE MANAGER

SPECIALIST IN INTERNAL MEDICINE,  
ENDOCRINOLOGY AND OBESITY

**Dr. Diana Hernández Juárez**  
Internal Medicine and Endocrinology  
specialist

**Dr Nancy Haydé Serrano Pérez**  
General practitioner

**Dr. David Rivera de la Parra**  
Ophthalmologist

**Mtra Liliana Pérez Peralta**  
Optometry expert

**Lic. Verónica Yazmín Zurita Cortés**  
Optometry expert

**Mtra. María Victoria Landa Anell**  
Clinical nutritionist

**Mtro. Marco Antonio Malgrejo  
Hernández**  
Clinical nutritionist

**Nut Valeria Miranda Gil**  
Clinical nutritionist

**Mtra. Denise Liliana Arcila Martínez**  
Clinical psychologist

**Mtro. Rodrigo Eduardo Arizmendi  
Rodríguez**  
Clinical psychologist

**Dr. Héctor Rafael Velázquez Jurado**  
Clinical psychologist

**Mtra Fernanda Garnica Carrillo**  
Clinical psychologist

**Dr. María Teresa Alcántara Garcés**  
Psychiatrist

**Dr. Alejandra Monserrat Estefanía  
Rodríguez Ramírez**  
Psychiatrist

**Mtra. Liliana Andrea Villegas Narvaez**  
Physical activity manager

**Mtra. Luz Elena Urbina Arronte**  
Physical rehabilitation therapist

**ED María Luisa Velasco Pérez**  
Nurse manager

**Mtra. Angélica Yadira Palacios Vargas**  
Diabetes nutrition educator

**ED Claudia Lechuga Fonseca**  
Diabetes nutrition educator

**ED Francis Evelin Rojas Torres**  
Diabetes nutrition educator

**ED Héctor Manuel Infanzón Talango**  
Diabetes nutrition educator

**Dr Arely Hernández Jasso**  
Dental surgeon

**Dr Sofía Ríos Villavicencio**  
Dental surgeon

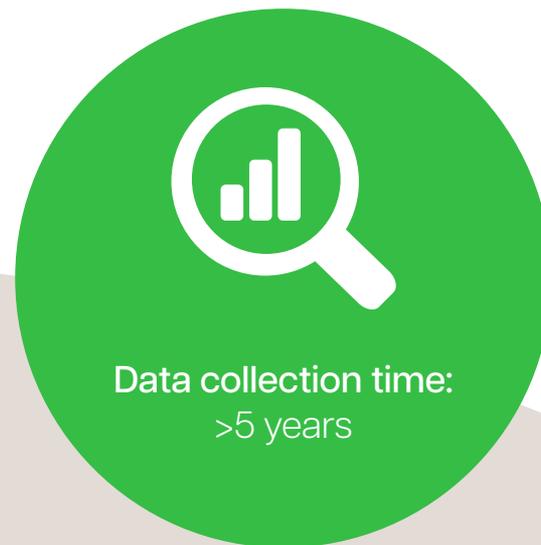

**Lic Arturo Flores García**  
Clinical nurse

**Lic Humberto del Valle Ramírez**  
Clinical nurse

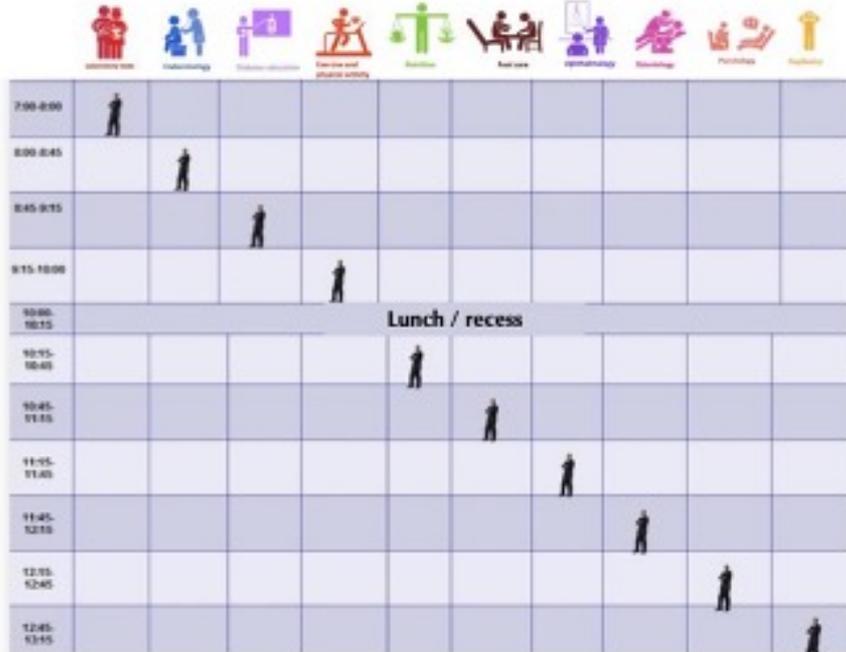

**Mariana Granados Arcos**  
Administration

**Norma Sandra Sainos Muñoz**  
Administration

## Experience implementing ICHOM Sets

## Clinical pathway

## Resource investment

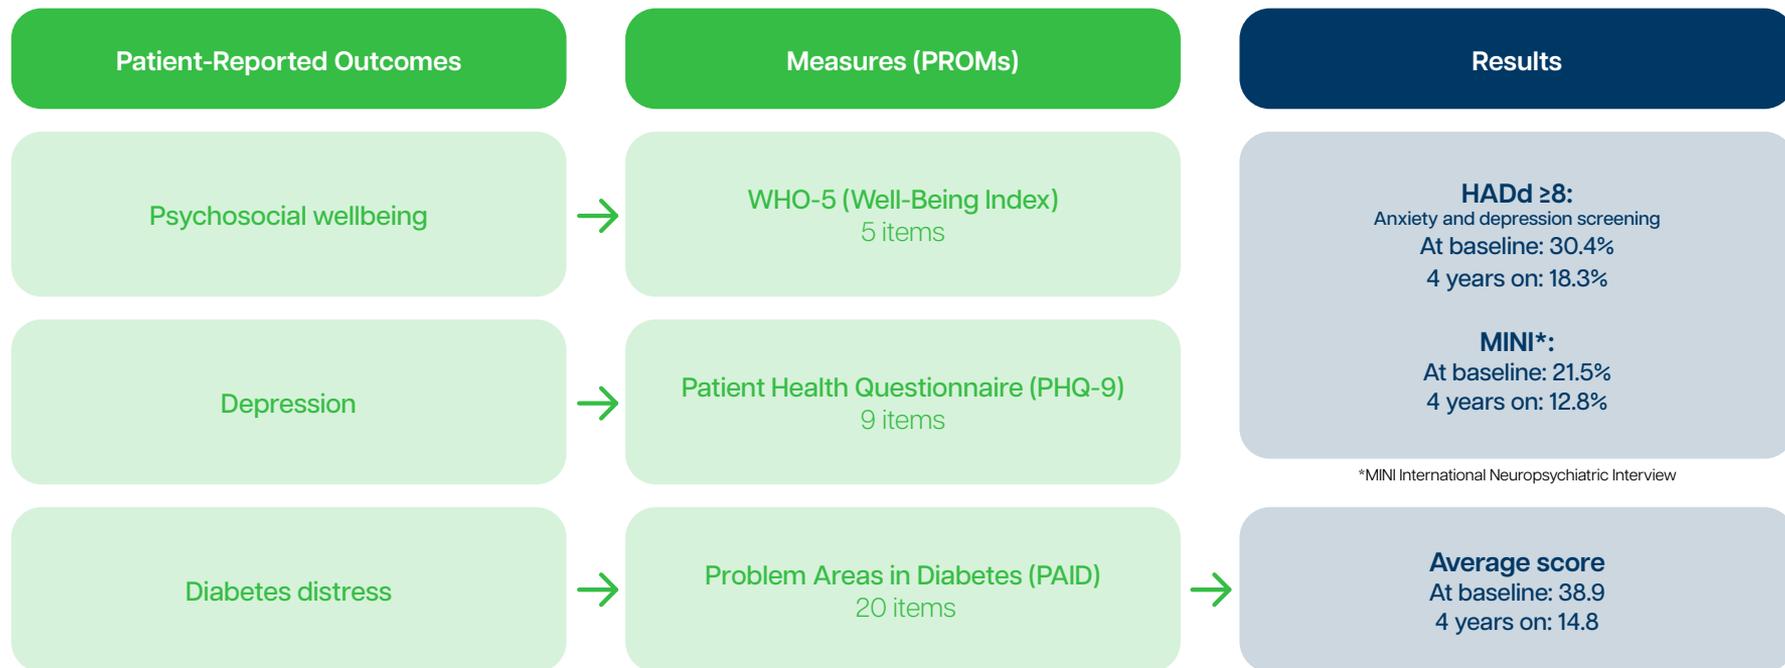

Healthcare Resource	1st Year	2nd year and plus
<b>CAIPaDi Cost - per patient</b>	1st Year	2nd year and plus
<b>Total Cost (2019 USD) - per patient</b>	\$2,706	\$582

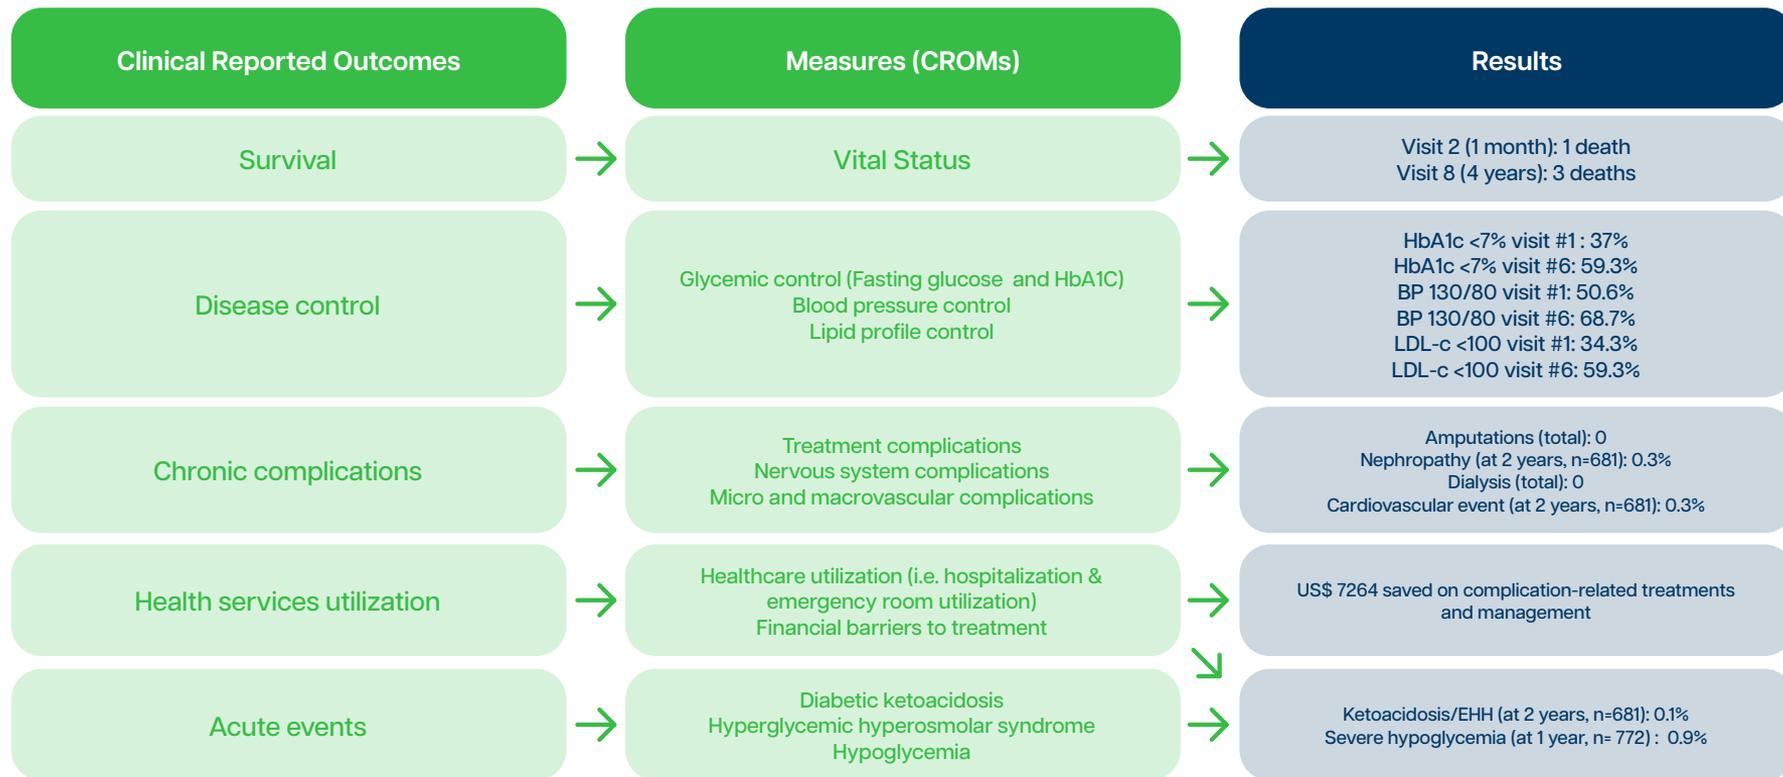

*Each consultation represents approximately \$559 USD per patient.  
The first year of treatment includes 4 visits, after which each visit becomes annual (unless more visits are necessary due to individual circumstances).*

Healthcare Resource	1st Year					2nd year and plus

*Cost-effectiveness of a self-management and comprehensive training intervention in patients with type 2 diabetes up to 5 years of diagnosis in a specialized hospital in Mexico City*

## Summary of outcomes measured: PROMs

at baseline, 1 month, 2 months, 3 months and 12 months

## Elements of success and lessons learned

**1**

Systematization of procedures - patients must always go through the same care pathway and all aspects of consultation must be covered by all professionals

**2**

Have a structured approach to patient care and follow this structure while maintaining an individual approach to each patient

**3**

Investing in electronic tools will make all aspects of implementation, as well as data collection and analysis, more feasible and practical

**4**

Treat each patient in a comprehensive manner, the individualisation of patients within a standardized model is essential to achieve results in patients and enhance patients' adherence to treatment

**5**

Give mental health equal importance as other clinical aspects as it is key in a patient's wellbeing

**6**

Continuous analysis of data is essential for improvement of process and acknowledgement of real impact on patients' overall well-being

# Challenges in implementing the Set

## **Achieving patient adherence to treatment:**

the healthcare team must ensure that the patient remains motivated and committed to the programme

## **Achieving professionals' adherence to the programme:**

institutional resources and infrastructure must ensure that the healthcare team remains committed to the programme
