

International Consortium for
Health Outcomes Measurement

Patient Partner Alliance (PPA)

Global standards.
Patient led impact.

The ICHOM Patient Partner Alliance is a global, non financial partnership that brings together patient organizations committed to improving healthcare by ensuring lived experience informs how outcomes are defined, measured, and used.

Why the Patient Partner Alliance matters

Patient voices are essential to defining outcomes that truly matter. The PPA exists to ensure patient experience is embedded early and consistently in global standards, not added as an afterthought. **The Patient Partner Alliance enables long term, meaningful patient engagement across ICHOM's work.**

Through the PPA, patient organizations partner with ICHOM to ensure lived experience is embedded throughout set development and beyond, informing priorities, implementation, and understanding of impact over time.

This ongoing partnership helps ensure global standards remain relevant, inclusive, and grounded in real world patient experience.

What patient organizations gain through the PPA

- A sustained platform to influence international healthcare conversations
- Opportunities to shape future priorities in patient centered care
- Visibility for patient led work across global health communities
- Connection to a global network of patient centered organizations

What patient organizations contribute to ICHOM

- Insight into patient needs, barriers, and trade offs across conditions
- Perspective on feasibility, equity, and unintended impact in practice
- Input that helps future proof ICHOM's work as patient priorities evolve
- Long term partnership that strengthens trust and credibility of standards

About ICHOM

ICHOM is an independent, not-for-profit organization that brings together clinicians, researchers, and people with lived experience to define global standards for patient-centered outcome measurement. ICHOM Sets are used in over 60 countries to improve care by measuring what matters most to patients.

How the Partnership Works

Patient Partner Alliance members engage with ICHOM through flexible, ongoing, collaboration, based on relevance, interest, and capacity including:

- Contributing patient insight to ICHOM Set development and updates
- Sharing lived experience to inform implementation and improvement work
- Participating in consultations, learning activities, and knowledge exchange
- Helping identify emerging priorities in patient centered outcomes
- Supporting awareness and dissemination of outcomes that matter

What PPA Members Receive

Visibility across ICHOM platforms including website, newsletters, and social media

Opportunities to spotlight your organization and mission

Invitations to relevant webinars, events, and the ICHOM Conference

Connection to a global network of patient centered organizations

Ongoing engagement beyond one off projects
